			N	4	12 x 25 Flat Washers
			P	4	10 x 25 Flat Washers
			R	2	M12 x 40 Bolts & Nyloc Nuts

**IMPORTANT:** Towball may need to be removed when not in use to avoid obscuring number plate. Please inform customer.

- Temporarily disconnect the fixing from the underside of the bumper (C4 Coupe and 308 will require undertray to be removed, and trimmed to suit towbar).
- Temporarily lower the exhaust from its rearmost hangers.
- Remove the lashing eyes (if fitted – these are not refitted with the towbar).
- Remove and replace the original M8 fixings through the rear valance with **Item K** and **Item M**.  
**Note:** The nearside fixing may not be in place, so use the extra nut provided to fix **Item K** in place, and fully tighten.
- Locate **Item B** onto **Item K** and existing studs on nearside chassis fixing in place with **Item P** and **Item G**.
- Locate **Item C** onto **Item K** and existing studs on offside chassis fixing in place with **Item P** and **Item G**.
- Using **Item J**, bolt **Item A** in between **Item B** and **Item C**.
- Using **Item L** with **Item N** and **Item R** with **Item N** bolt **Item E** to **Item A**.
- Using **Item F**, bolt the ball (not supplied in this kit) to **Item E**.
- Fully tighten all nuts and bolts, and ensure the towbar is rigid and secure.
- Re-hang the exhaust.
- Note:** For engine code EW10J4S, **Item D** and **Item H** are required to re-hang the exhausts (see sketch).
- Refit undertray on C4 Coupe, if fitted, and central bumper fixing.

**Note:**

Nose load limits and vehicle manufacturer's trailer / caravan weight limits must be observed.
